

Position Title Hydraulic Engineering/Water Resources - Project Manager

Job Description Working at AECOM makes you a member of a global team and an award-winning company. You are supported through a network of connections within your role, your discipline and the regions in which you operate.

With 41,000 people in more than 100 countries, AECOM is a leader in all of the key markets that it serves. Our highly capable team provides a blend of global reach, local knowledge, innovation and technical excellence in delivering solutions that enhance and sustain the world's built, natural and social environments.

AECOM understands the value of our natural environment and the need to minimize impacts from society and industry. As one of the world's leading global consultancies, our 5,000 talented professionals have a long history of providing environmental solutions for clients around the world.

AECOM is looking for a Project Manager for its Water Resources department in Redmond, WA. The successful candidate has the ability to manage a detailed phase of work related to hydraulic and hydrologic engineering project. The Project Manager's responsibilities include; proposal team coordination and writing, cost estimating, scope definition, project planning and implementation, project team (in-house and client) communication, scope management cost and quality

control, completion of technical work with support of group staff, project health and safety, and reporting and communication of project results and deliverables to client(s). The Technical project work requires a broad knowledge in one or more of the areas of hydraulic and hydrologic engineering; physical hydraulic and numerical modeling; conceptual design of hydraulic structures such as water, wastewater, and hydropower facilities; water quality and sediment transport analysis; and applicable regulatory standards. The Project Manager will work under the supervision of the Hydraulic Engineering and Modeling Services Department Manager in Redmond, WA and will assist in staff mentoring and growth, business development and client interaction.

Qualifications include minimum Bachelors Degree, in Civil or Mechanical engineering or related discipline with 6+ years of relevant experience, or Masters degree with 4+ years of relevant experience. The candidate should have a professional engineering license or should be able to get it within two years.

AECOM employees around the world enjoy a wide range of benefits and competitive compensation package. AECOM is much more than just a place to work. It's a place where you can put your innovative thinking and business skills into high gear and work alongside other highly intelligent and motivated people. It's a place where you can apply

your skills to some of the world's most challenging, interesting, and meaningful projects world wide. It's a place that values the diversity of our areas of practice and our people. It's what makes AECOM a great place to work and grow. Come grow with us! For more information on AECOM, please visit our website at www.aecom.com. AECOM is an Equal Opportunity Employer.
